Advertia! la foto puede diferir del actual producto

- \* Hydro MPC-E maintains a constant pressure through continuous adjustment of the speed of the pumps.
- \* The system performance is adapted to the demand through cutting in/out the required number of pumps and through parallel control of the pumps in operation.
- \* Pump changeover is automatic and depends on load, time and fault.

The system consists of these parts:

- \* Pump parts in contact with the pumped liquid are made of stainless steel EN DIN 1.4301
- \* Pump bases and heads are of either cast iron/stainless steel (CRI) or cast iron EN-GJS-500-7 (CR), depending on pump type; other vital parts are made of stainless steel EN DIN 1.4301
- \* The pumps are equipped with a service-friendly cartridge shaft seal, HQQE (SiC/SiC/EPDM)
- \* Two stainless steel manifolds to EN DIN 1.4571
- \* Stainless steel base frame to EN DIN 1.4301 up to CR 64. Above CR 64 the pumps are placed on a galvanized C-profile frame
- \* One non-return valve (POM) and two isolating valves for each pump
- \* Non-return valves are certified according to DVGW, isolating valves according to DIN and DVGW
- \* Adapter with isolating valve for connection of diaphragm tank
- \* Pressure gauge and pressure transmitter (analog output 4-20 mA)
- \* Control MPC in a steel cabinet, IP54, including main switch, all required fuses, motor protection, switching equipment and microprocessor-controlled CU 352.

Dry-running protection and diaphragm tank are available according to the list of accessories.

Pump operation is controlled by Control MPC with the following functions:

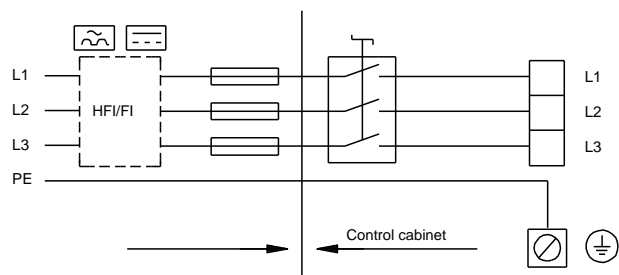

- \* Intelligent multipump controller, CU 352.
- Constant-pressure control through continuously variable adjustment of the speed of each individual pump.
- PID controller with adjustable PI parameters (Kp + Ti).
- Constant pressure at setpoint, independent of inlet pressure.
- Soft pressure build-up (To prevent water hammer during startup).
- On/off operation at low flow.
- Automatic cascade control of pumps for optimum efficiency.

Contar	Descripción
	<p>           Selection of min. time between start/stop, automatic pump changeover and pump priority.            Automatic pump test function to prevent idle pumps from seizing up.            Possibility of standby pump allocation.            Possibility of backup sensor (redundant primary sensor).            Secondary sensor (Possible to switch to another sensor/setpoint).            Multi-sensor (up to 6 sensors to influence the setpoint).            Manual operation.            Possibility of external setpoint influence.            Log function.            Setpoint ramp.            Possibility of digital remote-control functions:            System on/off.            Max., min. or user-defined duty.            Up to 6 alternative setpoints.            Digital inputs and outputs can be configured individually.            Pump and system monitoring functions:            Minimum and maximum limits of current value.            Inlet pressure.            Non-return valve monitoring.            Motor protection.            Sensors and cables monitored for malfunction.            Alarm log with the previous 24 warnings/alarms.            Display and indication functions:            Colour screen display.            Green indicator light for operating indications and red indicator light for fault indications            Potential-free changeover contacts for operation and fault.            Grundfos bus communication.         </p> <p>           It is possible to add CIM communication modules for communicating with Scada/BMS.         </p> <p>           Pumps, piping, cabling complete as well as Control MPC are mounted on the base frame.            The booster system has been preset and tested.         </p> <p> <b>Fluido:</b> Agua  <b>Presión max. del sistema:</b> 16 bar  <b>Caudal (Instalación):</b> 210 m³/h  <b>Alimentación:</b> 380-415 V  <b>Corriente nominal instalación:</b> 107,5A-400V  <b>Potencia nominal:</b> 18.5 kW  <b>Peso neto:</b> 891 kg         </p> <p>           Maximum head: 111 m            Maximum flow: 210 m³/h         </p>

## 96941382 HYDRO MPC-E 3 CRE45-3 50 Hz

Descripción	Valor
<b>Información general:</b>	
Producto::	HYDRO MPC-E 3 CRE45-3
Código::	96941382
Número EAN::	5700314239121
<b>Técnico:</b>	
Caudal nominal:	162 m <sup>3</sup> /h
Caudal máx.:	210 m <sup>3</sup> /h
Altura nominal:	86.1 m
Altura máx.:	111 m
Nombre de la bomba principal:	CRE45-3
Bomba princ. n.º:	96123406
Número de bombas:	3
Válvula antirret.:	lado descarga
<b>Materiales:</b>	
Colectores:	EN/DIN 1.4571/ AISI 316 TI
<b>Instalación:</b>	
Presión de trabajo máxima:	16 bar
Presión de entrada máxima permitida:	4.9 bar
Entrada de colector:	DN200
Salida de colector:	DN200
Presión nominal:	PN16
Toma de tierra:	PE
Diseño del sistema:	D
<b>Líquido:</b>	
Líquido bombeado:	Agua
Rango de temperatura del líquido:	5 .. 60 °C
Temperatura del líquido durante el funcionamiento:	20 °C
Densidad:	998.2 kg/m <sup>3</sup>
<b>Datos eléctricos:</b>	
Potencia (P2) bomba principal:	18.5 kW
Frecuencia de red:	50 Hz
Tensión nominal:	3 x 380-415 V
Intensidad nominal del sistema:	107,5A-400V
Tipo de arranque:	electronicam.
Grado de protección (IEC 34-5):	IP54
Supresión de radiointerferencias:	EMC DIRECTIVE(2014/30/EU)
<b>Paneles control:</b>	
Control type:	E
Dry running protection, mechanical:	NONE
<b>Depósito:</b>	
Depósito de membrana:	No
<b>Otros:</b>	
Peso neto:	891 kg
Peso bruto:	950 kg
Gama de productos:	Internacional
Fichero de configuración Control MPC:	98271947
Fichero de configuración Hydro MPC:	98272018
País de origen.:	DE
Tarifa personalizada n.º:	84137075
